

the GPHF-Minilab®

A mobile compact laboratory for fast and inexpensive detection of counterfeit medicines – supplied by TTM.

The task of the Global Pharma Health Fund e. V. (GPHF), a non-profit initiative of Merck, is the detection of counterfeit medicines. The GPHF-Minilab® was developed for this purpose.

The GPHF-Minilab® is a portable laboratory for quick and easy detection of counterfeit medicines. TTM is the worldwide exclusive provider of this laboratory and is responsible for the compilation and shipping.

Further information on the GPHF-Minilab® is available here: <https://www.gphf.org/> or of course from us.
